

Terms of use

What you may do with this workbook, in plain words.

For the seller, before publishing: this text is a working draft prepared as part of the build, and it has not been reviewed by a lawyer. Have it checked against the law where you trade and against Etsy's current seller policies, add the contact details you want buyers to use, and delete this box before the file goes into the buyer package.

What you are buying

A licence to use The Christmas Season Master Command Center™ — a spreadsheet workbook and its accompanying documents — for your own personal, household use. You are not buying the design, the formulas, the wording or any other part of the product itself.

What you may do

- Use it for your own Christmas planning, year after year, for as long as you like.
- Save copies for yourself, and keep one copy per year as a record.
- Change it: rename categories, add rows, adjust colours, hide sheets, unprotect sheets and rewrite formulas.
- Print it for your own use, and share the file with people in your own household.

What you may not do

- Resell it, give it away, or share the file outside your household.
- Upload it anywhere it can be downloaded by others, including template libraries and file-sharing sites.
- Sell anything made from it, including a modified version, a translation, or a derivative template.
- Use it as a paid service for other people, or as part of a course, membership or bundle.
- Claim it as your own design, or remove the attribution from it.

Refunds

This is a digital download. Because the files are yours the moment you receive them, they cannot be returned. If a file will not open, or something in the workbook is wrong, get in touch and it will be repaired or refunded. This does not affect any statutory right you have.

What is not promised

The workbook is a planning tool. It records what you tell it and adds it up. It is not financial advice, and it cannot know about a purchase you have not entered. It is supplied as it is, and it has been tested in Microsoft Excel and Google Sheets as described in the compatibility notes; other software is not supported. The seller is not liable for a decision made from a figure in it, or for any loss arising from its use, so far as the law allows.

Your data

Everything you type stays in your own file, on your own device or drive. The workbook contains no macros, no tracking, no add-ins and no connection to any service. Nothing is sent anywhere, and the seller never sees any of it.

Getting in touch

Message Mlissia through your Etsy order. Support covers the files as delivered.
